American taxpayers are paying census for fraudulent information collection. we use the census for redistricting. redistricting sets out districts thqt shoudl include voters in each district. you shoudl not be including illegal immigrant lawbreaking sneaks in census counts as American citizens. they dont belong here, they are illegally living here and the count you do is used for redistricting to appoint senators and representatives. for you to use our tax dollars to include illegal immigrant sneaking lawbreakers into a census as an indicator of population in an area for setting up districts for voting skews the system entirely. when you do a census count you need to indicate who is an American citizens and who is not. why have you belen skewing and slamming the American population with this skewed count for so many years and doing a clear disservice to the American people. what a sham this agency is to hurt the American voting systemn this way. cities are hotbeds of illegals and yet they are counted as all citizen and then they hyave more reps in state and federal halls than American citizesnd do all because of your shifty corrupt wayh of counting. this needs to stop and it needs to stop now. this commetn is for the public record. please receipt. jean publiee it is fraud on the Aemrican people.
